# Joshua Mather

**App Developer**

## Class of 2019 Alumni

**Carmel was very enjoyable, from both a social and educational perspective. It helped me to grow and set me up for my future, especially in preparing me for uni. The staff and facilities were outstanding and I am very grateful for my time there.**

"After Carmel I studied Maths & Computer Science in Manchester. I did a year in industry which greatly improved my skills, and graduated with a first class degree.

I am currently working as an app developer for a company called Gloversure, which is based in Welshpool and Chester.

I'm really enjoying my job at the moment. Through my studies I found I enjoyed programming and building projects, so it has been great to be able to do that as part of a job. I have been able to grow my skills well at this job and have made some great friends."
